# Welcome to BEACON CONNECT

Over the past two years, we've engaged with our customers through Customer Advisory Board Meetings, listening and collaborating on ideas to improve your user experience.

The message we received was clear: School Districts need a centralized communication platform that includes messaging, calendar events, routing requests, and student incident reports. Robust sorting and reporting tools were also a must.

From these insights, suggestions, and collaboration sessions, Beacon Connect was born!

Introducing the industry's FIRST connected communication platform for school transportation professionals.
A one-stop technology that seamlessly connects drivers, dispatchers, and customers.

The information you need, WHEN you need it, at your fingertips.

All communication runs through the portal: nothing gets missed!

Full transparency and team collaboration for changes and requests.

FEATURES THAT MAKE SENSE

ROUTING REQUESTS
Electronic Routing Requests Initiated by the district.

VIDEO REQUESTS
Download single or multiple videos and track requests from school administrators.
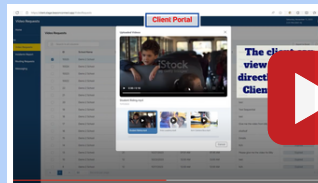

STUDENT INCIDENT REPORTS
Drivers can initiate Student Incident Reports that can be easily downloaded.

COMMUNICATION
In real time between dispatchers, schools, and drivers. Shared calendar events and internal contact info.
