

HOW TO LOG IN TO BEACON CONNECT

This guide provides detailed instructions for logging into Beacon Connect.

1. Login Page

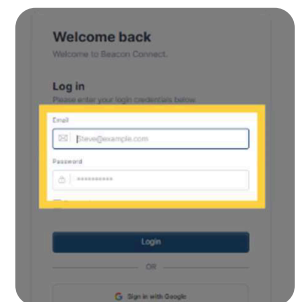

When logging into Beacon Connect, we provide our customers with two options for access: the traditional Email and Password, but also a Google & Microsoft SSO for customers with email servers on these respective platforms.

2. Traditional Email & Password

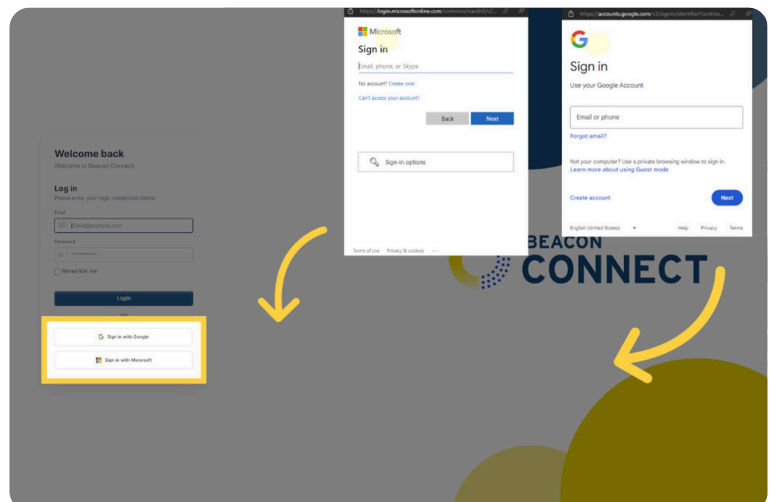

If you forget your Beacon Connect credentials, check your inbox & Junk Email folder for an email with this information from Cenoreply@gobeacon.com

You can also email beaconconnect@gobeacon.com if you need a password reset.

3. Google or Microsoft Login

When logging into Beacon Connect with Google or Microsoft, you may see a prompt like one of the two on screen, asking you to verify your work credentials.

Thank you for using Beacon Connect!
